Andrés Frías

Senior Full Stack Engineer

+1 (809) 994-9181 | afriasdev@gmail.com | linkedin.com/in/andres-frias-guzman

GitHub: github.com/SentenciaSQL | https://andresfrias.dev | Santo Domingo, Dominican Republic

Professional Summary

Senior Full Stack Engineer with 14+ years of experience building enterprise applications using Java, Spring Boot, Spring Security, REST APIs and microservices. Experienced in designing scalable backend systems, secure authentication (JWT/OAuth2), SQL optimization, AWS, Docker, CI/CD and AI-assisted development with GitHub Copilot and Cursor.

Technical Skills

Backend Development:

Java 8 - 25, Spring Boot 3, Spring Security, Spring Data JPA, Spring Cloud, Spring AI, Spring WebFlux, C#, .NET Core, Python, Node.js, OAuth2 / OpenID Connect, RESTful APIs, Microservices, JWT Authentication, Maven, JUnit, Mockito, Testcontainers

AI & LLM:

OpenAI API, Anthropic API, LangChain, LangGraph, AI Agents, LLM Orchestration

Frontend Development:

Angular, React, TypeScript, JavaScript, HTML5, CSS3, Angular Material, Tailwind CSS, Responsive Design, Karma, Jasmine, Cypress

Cloud and DevOps:

Amazon Web Services (AWS EC2, S3, RDS, Lambda, API Gateway, CloudFormation, Amplify), Azure, Google Cloud Platform, Terraform, Docker, Jenkins, GitHub Actions, CI/CD

Databases:

PostgreSQL, Oracle, PL/SQL, MySQL, SQL Server, Redis, Flyway, Liquibase, SQL Optimization

Mobile Development:

Flutter, Dart, Android, Ionic, React Native

Practices and Tools:

Git, Jira, Agile, Scrum, Clean Code, SOLID, Unit Testing, System Design, Swagger/OpenAPI

Additional Technologies:

Java EE, JSP, JSF, PHP, jQuery, Bootstrap, Apache Cordova, JBoss, Log4j

Professional Experience

Senior Full Stack Developer – OneSeven Tech (Miami, USA) | 02/2026 – 06/2026

- Developed features for enterprise SaaS products within the Omeda ecosystem using Angular, TypeScript and Java-based REST APIs.
- Led the frontend integration of a LangGraph Cloud conversational AI agent, implementing real-time Server-Sent Events (SSE) streaming and NgRx-based state management.
- Built bidirectional communication between an Angular application and an external micro-frontend built with Angular Elements.
- Implemented secure authentication and identity validation using JWT tokens and Omeda's identity provider.
- Applied modern Angular patterns, including signals, standalone components and optimized change detection, to create maintainable and responsive user interfaces.
- Collaborated with backend engineers, product stakeholders and QA through Git-based workflows and Jira.
- Technologies: Angular 18, Signals, Angular Elements, NgRx, TypeScript, Bootstrap, Java, Spring Boot, Python, LangChain, LangGraph Cloud, AI integrations, JWT, AWS Amplify, PostgreSQL, Git, Jira.

Senior Systems Engineer – The CE Shop (Denver, USA) | 03/2023 – 11/2025

- Engineered and optimized a high-traffic customer-facing e-commerce platform using Java/Spring Boot, React, Angular and Drupal, supporting thousands of daily users with low-latency performance.
- Designed and implemented RESTful APIs powering the company's Learning Management System (LMS), increasing platform uptime.
- Built user management tools in Java/JSF, reducing administrative tasks.
- Performed code reviews and integrated CI/CD pipelines to ensure maintainability and faster deployments.
- Collaborated with AWS and PostgreSQL infrastructure teams to enhance scalability and monitoring.
- Technologies: Java, Spring Boot, Angular, React, TypeScript, JavaScript (ES6+), jQuery, Drupal, PostgreSQL, DynamoDB, Redis, AWS, Tailwind CSS, SCSS, Jira, Git.

Senior Systems Engineer – Indra Sistemas S.A (Santo Domingo, D.R.) | 06/2020 – 03/2023

- Developed, maintained, and optimized Java-based batch processes for large-scale energy distribution systems, working with Spring Boot, Oracle PL/SQL, stored procedures, and high-volume data processing.
- Developed and maintained web and mobile apps using Java, Angular, Android, Flutter and React Native, applying SOLID and clean architecture principles.
- Optimized energy distribution systems, cutting processing time by 90% through algorithmic and database tuning.
- Developed reusable React components following modern frontend architecture and best practices for the Naturgy application.
- Led the migration of Mi EDEEste mobile app from React Native to Flutter, improving UI responsiveness and maintainability.
- Technologies: Java, Spring Boot, Quarkus, Angular 2+, jQuery, Oracle PL/SQL, Android, Flutter, React Native, React, Docker.

Programmer Analyst & Front-End Developer – Excellent Integrity Solutions (Santo Domingo, D.R.) | 02/2012 – 06/2020

- Built and deployed a mobile payment app for Todo Pago Dominicana, reducing transaction time by 40% and improving user adoption.
- Enhanced telecom data recovery systems post-Hurricane Irma for the Virgin Islands, restoring service continuity.
- Improved PL/SQL query efficiency for ARS Humano by 30% through SQL optimization.
- Designed an inventory system for Key Food stores in New York, streamlining stock tracking across multiple locations.
- Technologies: Java EE, PHP, C#/.NET, Angular, Ionic, Cordova, Bootstrap, HTML5, CSS3, jQuery, Oracle PL/SQL, MySQL, SQL Server, MongoDB.

Education

Bachelor's degree in computer science – Universidad Autónoma de Santo Domingo (2007 – 2018)

Master's degree in data science and Artificial Intelligence - Universidad Autónoma de Santo Domingo (2026 - present)

Certifications & Courses

• Flutter & Advanced Flutter – Udemy (2020–2021)

Languages

• Spanish – Native • English – Professional Working Proficiency (B2+)
